### 2.1 Procedure

*Title:* Control Valves hydrogen delivery stations (HDS)

*Description:* This European tender relates to the control valves for the Hydrogen Delivery Stations (HDS). These HDS connect customers to the Gasunie hydrogen network and are also used for accountable measurement and gas treatment. Pressure reduction is one of the main functionalities of the HDS. In the design, Gasunie decided to use electrically controlled control valves for pressure control. The size of the contract in this tender control valves HDS is estimated to be 200 control valves HDS, including spare parts. These control valves HDS are intended for the approximately 95 HDS. The control valves HDS are expected to be delivered between 2024 and 2030. These numbers are indicative and offer no certainty for the future. Candidates may therefore not derive any rights from it. Gasunie is not obliged to actually place (further) orders with the contractor. The maximum value of the contract is €9.000.000 control valves for the entire term of the framework agreement, excluding indexation.
