VI.3) Additional information:

Participation in the tendering procedure may only take place by electronic means via the electronic tendering system, see the address set out in section I.3). For access to the tender documents, the tenderer must be

registered or register as a user. If the tender contains several versions of the same document, the latest uploaded version will apply. Interested operators are requested to keep updated via the electronic tendering system.

All communication in connection with the tender procedure, including questions and answers, must take place through the electronic tendering system. Questions must be submitted not later than the date specified in Appendix B. Questions asked after this date will be answered if they are received in time for the contracting entity to provide the information required and communicate the answers not later than six days before expiry of the application deadline. Questions received later than six days before expiry of the deadline cannot expect to be answered unless the deadline is also postponed.

The tenderer must together with its tender submit an ESPD as preliminary documentation of the circumstances set out in section 148(1), paras 1-3 of the Danish Public Procurement Act (udbudsloven) ("The Act").

The tenderer will be excluded from participation in the tender procedure if the tenderer is subject to the compulsory grounds for exclusion set out in sections 134 a, 135 and 136 of the Act, unless the tenderer has submitted sufficient documentation of its reliability in accordance with section 138 of the Act.

Before the award decision is made, the tenderer to whom the contracting entity intends to award the contract must provide documentation of the information submitted in the ESPD pursuant to sections 151-152, cf. section 153 of the Act. As an alternative to the documentation mentioned in sections 153-155, 157 and 158 of the Act, the tenderer may submit to the contracting entity a certificate of registration in an official list of approved economic operators, see section 156 of the Act, issued by the competent authority. The contracting entity only accepts certificates of registration in an official list from tenderers established in the country holding the official list.

It is not necessary for the Tenderer to sign the ESPD document. For groups of operators (e.g. a consortium), a separate ESPD must be submitted for each participating operator. Where the Tenderer is a group of operators, the ESPD document of each participant in the group must be signed by the participant in question. The Tenderer heading the group and submitting the tender is not required to sign its ESPD document. If the tenderer relies on the capacities of other entities, an ESPD must be submitted for and signed by each of the entities on which it relies.

Attention is drawn to Article 5k in Regulation (EU) No 833/2014 as later amended which applies for the tender procedure. The provision contains a prohibition against award of contracts to Russian companies and Russian controlled companies etc. (reference is made to Article 5k, section 1, for the exact delimitation of the actors covered by the prohibition). The contracting entity may at any time during the tender process require that the economic operators prove that they are not covered by the prohibition, for example by requiring a declaration to this effect and/or documentation regarding the economic operators' and any subcontractors' place of establishment and ownership.

Section II.2.7): Note that the indicated term will commence from ordering the UHPLC-MS (delivery time 12 weeks) and that it is based on the minimum warranty period of 12 months. The tenderers may offer a longer warranty period, thus the duration can be longer.

The contracting entity may use the procedure of section 159(5) of the Act in the event that applications or tenders do not comply with the formal requirements of the procurement documents.
